-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2837

UNITED STATES DEPARTMENT OF COMMERCE
Patent and Trademark Office
ASSISTANT SECRETARY AND COMMISSIONER OF PATENTS AND
TRADEMARKS
Washington, D.C. 20231

Paper No:20090113
Application No:10/577156
Filing Date: April 26,2006

1. The disclosure is objected to because of the following informalities: Page 2, line 21, "relater" is misspelled.

Appropriate correction is required.

2. The drawings are objected to because figures 3,5,7,8. Element B1 "foos" is misspelled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

Art Unit: 2837

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7-12,14-20,22 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuasa et al (6550587).

Yuasa et al teaches in figures 1-10, an operating panel for an elevator.

A touch panel 4 contains floor registering buttons 11 which are acted upon by passengers. An indicator bar 12 with a car indicator 12a also illustrates the location and direction of a car. Also present is floor information portions 13 which can be changed as well as direction display 14 and car position 15 and also image 16 and message display 17.

The registering of a floor on buttons 11 changes the shape and color of the buttons on the display to indicate that the call has been registered. As illustrated in figures 3-6, a floor 2,4 registration changes the shape and/or color of the button display to coincide with the indicator bar and information display portions.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13,21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuasa et al and Fukumizu (JP 01242378 A).

Yuasa et al does not teach a display action upon a car cancel decision by the passenger.

Art Unit: 2837

Fukumizu teaches that for an elevator panel switch cancel operation, it is advantageous to provide an indication to the user of a cancel operation. The lighting of the lamp is switched based on a repush of the car call button in order to cancel the call. Thus, to provide an indication of a car call cancel for notification to a passenger would have been an obvious engineering design choice to one of ordinary skill in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sirigu et al., Velauthapillai et al., Jununen et al., Bittar et al, Schroder et al, Schuster et al and Felder et al are cited to illustrate similar elevator call panel buttons/displays which are changeable and interactive.

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
